Summary

Software Engineering and Full-Stack Development enthusiast pursuing a B.Tech in Electronics & Communication Engineering with hands-on experience building and deploying full-stack applications. Strong foundation in C++, Data Structures & Algorithms, Object-Oriented Programming, RESTful APIs, authentication, database-driven applications, and software development. Experienced in designing, developing, testing, and deploying web applications using React, Node.js, Express.js, and MongoDB.

Education

National Institute of Technology, Arunachal Pradesh	2024 – 2028
<i>B.Tech in Electronics & Communication Engineering</i>	<i>Expected 2028</i>
Bihar School Examination Board (BSEB)	2023
<i>Class XII – Science</i>	<i>79.2%</i>

Projects

ShopEasy – Full-Stack E-Commerce Platform June 2026
React.js, Node.js, Express.js, MongoDB, JWT, Razorpay

- Developed and deployed a full-stack e-commerce platform with product discovery, search and filtering, cart management, authentication, order processing, and administrative controls.
- Implemented JWT-based authentication using HTTP-only cookies and role-based authorization to secure user and administrator operations.
- Integrated Razorpay payment processing with order creation and payment verification, enabling secure checkout and role-based order management.
- Designed RESTful APIs for products, users, reviews, carts, and orders using Node.js and Express.js with MongoDB Atlas for cloud data storage.
- Implemented global authentication and cart state management using React Context API and React Hooks.
- Live Demo | GitHub

Previous Year Papers Portal 2026
Node.js, Express.js, MongoDB, Passport.js, EJS, Cloudinary, Brevo

- Developed a full-stack academic portal enabling students to access previous-year question papers organized by subject and year.
- Implemented session-based authentication and admin-only paper upload functionality using Passport.js and role-based access control.
- Built a password recovery workflow using OTP verification and email-based authentication with Brevo.
- Integrated Cloudinary for scalable document and media storage and designed RESTful CRUD APIs backed by MongoDB Atlas.
- Live Demo | GitHub

Technical Skills

Programming Languages: C++, JavaScript (ES6+)

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Complexity Analysis, Problem Solving

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, React Hooks, Context API

Backend: Node.js, Express.js, Passport.js, RESTful APIs, MVC Architecture, CRUD

Databases: MongoDB, MongoDB Atlas, Mongoose

Authentication & Security: JWT, HTTP-only Cookies, Session Authentication, Role-Based Authorization, OTP Verification

Tools & Platforms: Git, GitHub, VS Code, Cloudinary, Render, Vercel

Coding Profile

LeetCode: Solved 100+ Data Structures & Algorithms problems Profile
